

Gentell Wound Care Management System

Allows you to help heal all types of wounds

Aloe Vera based Hydrogel will stimulate healthy cell growth, while keeping the wound bed moist.

Wound Cleanser promotes healing by assisting in removal of inflammatory stimulants including: foreign substances, exudates, necrotic tissue and microorganisms.

Calcium Alginate is used to absorb, collect and contain exudate while providing a moist healing environment.

Collagen products will accelerate wound repair. Wounds must be moist and free of necrotic tissue prior to application of the product.

These pre-made packages are dispensed by physicians directly to their patients. The products are reimbursable by Medicare and Most Major Carriers under the Physicians DME provider number. It will save your patients prescription costs and is highly recommended for the continuity of the patient's wound care.

Choose from our variety of products to help your Patients today!!
